

# LWKR/LWWR SERIES

## DESCRIPTION

These wrap-style fixtures are designed with a more decorative appearance than a typical fluorescent wrap. LWKR models have solid oak ends and side rails while LWWR models have solid wood ends and side panels with a painted white finish. These fixtures feature a smooth white acrylic diffuser, and ship assembled and ready for installation. Both series are available in 48" two-lamp and 48" four-lamp models. All units use T12 lamps.

## CONSTRUCTION

Housing and cover are die formed of 22 gauge cold rolled steel. LWKR ends and side rails are cut from solid wood with medium oak finish. LWWR ends and side rails are cut from solid hardwoods and painted white. Ends are screwed to housing, and side rails pivot in ends to hide steel housing sides. Standard mounting holes and standard wiring knockouts are included, with an extra 2" diameter center knockout on the back for wiring entry. Can be stem, chain, or direct mounted.

## FINISH

Housing and cover interior and exterior are finished in lighting grade white baked gloss enamel paint. LWKR ends and sides rails are stained in a medium oak finish. LWWR ends and sides rails are painted a gloss white enamel.

## DIFFUSER

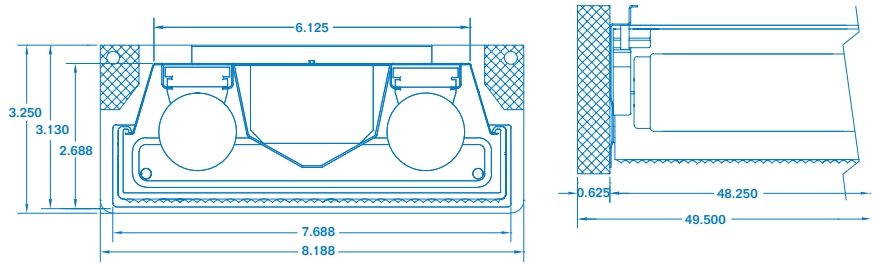

Lens is a one-piece extruded lens of smooth translucent white 100% virgin acrylic, .090" thick. The lens lifts and shifts onto the housing and hangs from a lip running the entire length of both sides of the housing.

## ELECTRICAL

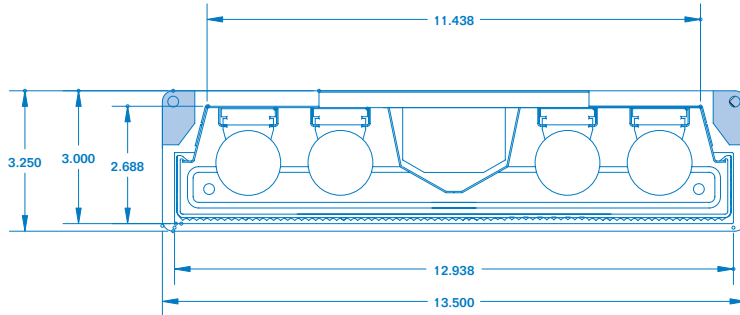

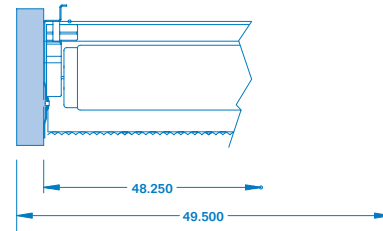

All units are wired with U.L. listed high power factor, rapid start, Class P, (ES) full light output  $\text{\textcircled{C}}$  ballasts, for 120 volt, 60 hertz A.C. operation. Lampholders are rotating lock, medium bi-pin type. All fixtures are U.L. listed.

## OPTIONS

Alternate clear prismatic diffuser available (contact factory). For ballast upgrades and options, refer to back of guide. Other voltages, listings, and ratings available on request (contact factory).
