

RB SERIES

DESCRIPTION

These modern, low profile white cloud fixtures have an updated look with ivory marble, white marble or basic white end caps. The smooth white acrylic diffuser is designed to hug the ceiling. They are available in two-lamp and four-lamp models, and use 48" T8 lamps.

CONSTRUCTION

Housing, cover and ends are die formed of 22 gauge cold rolled steel. Standard mounting holes and standard wiring knockouts are included, with an extra 2" diameter center knockout on the back for wiring entry.

FINISH

Housing interior and exterior are finished in lighting grade white baked gloss enamel paint.

DIFFUSER

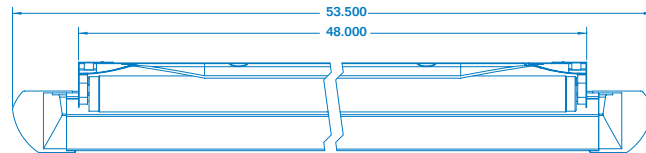

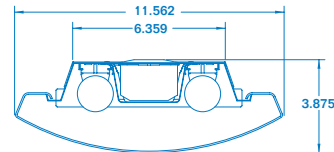

Lens is made from smooth translucent white 100% virgin acrylic, .125" thick, extruded into a soft rounded shape. End caps are injection molded smooth acrylic with a faux marble pattern. Returns on edges of the diffuser allow it to lift and shift onto the housing lip.

ELECTRICAL

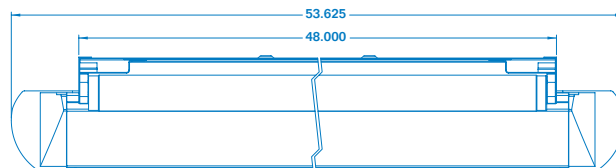

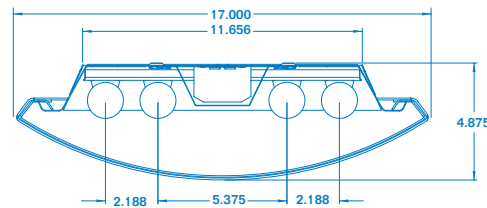

All units are wired with U.L. listed high power factor, rapid start, Class P, electronic ballasts for "T8 Octron" lamps at 120 volt, 60 hertz A.C. operation. Lampholders are straight snap in insertion, medium bi-pin type. All fixtures are U.L. listed for damp location.

OPTIONS

Custom end cap colors and two-foot fixtures also available (contact factory). For ballast options, refer to back of guide. Other voltages, listings, and ratings available on request (contact factory).
